SUPREME COURT—Special Term.—Before Judge Receivel —Decision.—Robert Emmet and others, Trustees, \$40.00 E. and A. Bönefi, non-rest-dense, agt. Wm. B. Draper and others.—This, the Court said, is an action brought on two promissory notes, amounting together to \$25,000, drawn by defendants in favor of the Messra Bonnfil, of Havre, in Franço.

The holders having become insolvent, and non-rest-dense, an attachment was issued against their property in this State, under which the plaintiffs were appointed Trustees for the benedit of the creditors, in which character, and as holders of the two notes is question; they

claim to be entitled to receive the whole amount due on their face from the defendants.

The defendants as a part payment, or set off, allege that after the appointment of the Trustees in this country an attachment in bankruptcy was issued against the Boosfils, in France, and rewhich the syndie or assignment that the Boosfils in France, and rewhich the syndie or assignment of the makers, in Havre, to the amount of \$10,000.

The question raised by the demurrerie, whether the Trustees here, or the syndie in France are the legal owners of the notes. As the title of the Trustees is first in point of time, it appears to me that the Courts of this State are bound to give it effect as to all property in this State, as well against the foreign assignee as against the Boosfils themselves, and it may fairly be presumed that the courts in France upon being advised that the makers of the notes have been compelled by a regular judgment to pay the whole amount in this country, will reliaquish the reizune made in France. The dite to the notes, as well as the possession, having possed to the Trustees here, there was nothing left in the Boosfie which could be claimed by the Franch assignees. The latter, therefore, having no claim to the notes, can'd not rightfully selze the preparty of the makers. Demurcer allowed. Answer overruled. Judgment for olstotif, as Trustees, for the benefit of all the creditors of the Bonaffis, for the full amount of the notes, interest and cost.

Superior Court-Special Term-Judge Duer-Habras Corpus—A young man named Thomas Church was brought up on a habeas corpus, on application of his father, and his discharge from sulfstment in the army saked for on the ground of minority. The proof being sufficient, he was discharged.

The Jury of Haquest called to frquire into the cause of the death of John Legelken, would respectfully present to the Common Council of the City of Brooklyn, that an ordinance should be passed similar to the one passed in relation to boys setting on behind omnibuses. Many of the Jury reside and do business on Atlanticets, and are cognizant of the fact that it is the common practice for children to watch the coning train and the nedeavor to jump on the platforms, to the imminent danger of their lives, notwithstanding every means taken by the employees of the road to prevent them from so deing. The practice is becoming to prevent on the danger to children so great, that they feel it a duty to press upon your homeable body some speedy and string on action to prevent its continuance.

JERSEY CITY ITEMS.

TEMPERANCE IN NEW-JERSEY .- The good people of the City of Newark are just now enjoying a series of Temperance meetings in Van Wagenen's Big Tent, which is located on Haksey-st, near the Park. The tent was put up on Thursday last, and on every evening since there have been crowded audiences .-Mr. Van Wagenen, Mr. Hewlett and others, have been on the rostrum, and have done good service.

Yesterday afternoon there was a regular meeting of the Essex County Temperance Alliance, to consider the proper steps to take in the coming election. There is to be a State Convention on the 16th of September, and a motion was made yesterday to send delegates from Essex County. A lengthy debate ensued upon the course proper for the delegates to take. The pre-vailing sentiment seemed to be to use whatever power the exclusive Temperance men might possess to secure from one or the other of the great parties the nomina tion of thorough-going Temperance men. It was thought that the ruuning of an independent Temperance ticket would be useless, as the majority of Temperance men would go with their parties, especially in the event of a Presidential election.

The motion to appoint Delegates was adopted, and the following gentletten were regularly appointed: Wm. L. Scarles, Henry C. Messler, isacc Banister, Ebenezer M. Dodd, Matthew O. Halsted, Zachariah Web ster, --- Pearson, (of Westfield,) Wm. M. Simbson' Benjamin Stainsby, John Munn, David Ripley, Isaac Webster, Rev. G. R. Snyder, Wm. M. Sales at the Stock Exchange Avc. 18.

past week. There is a general scarcity of Stocks, and orders cannot be filled but at hisber prices, which all are not yet prepared to give. Erie and Harlem are the only two good stocks which have not risen. In Harlem the sales have been large, 3,700 shares having been sold closing with a decline of 14. Of Erie only 725 shares were sold, the price receding 4. Eric Bonds are very scarce; the Convertibles of 1862 and 1871, being in demend at 99, few sales with a remarkable rise of 24 P cent, has taken place in Stonington with very free sales This has been accompanied with an improvement of 14, in Norwich, of which 640 shares were sold. To-day the connection of this railroad with the New-Haven has been completed, by the completion of the New-London and New Haven road. Delaware and Hudsen advanced 1 W cent Dauphin firm, but quier Its bonds sold to-day at 94 Ohlo Life and Trust advanced 34. Bank Stocks are rising rapidly : though the sales are not large the demand is great. Higher prices are yet in reserve to the holders, from the point of the the vast profits making now by the Banks, and the scarcity of premium first-class Stocks amid the general shundance of money.

Breadstuffs have risen to-day under a better shipping demand, based on private dispatches by telegraph from Boston, where the Canada has arrived. The advance, however, has been checked by a rise in freights. It is understood there are better prospects for a large demand for Wheat, Corn and Flour. The French barvests is spoken of as being likely to be deficlent, and rains have somewhat injured the English Wheat fields, and Corn is more inquired after from an extension of the Potato rot. There has, however, been in Ireland a very great increase in the planting, and as the population has been diminished considerably, the demand for Corn from this cause may not be so great as some anticipate.
